Obtaining a TB Test

We are required by law to have all persons working in the classroom to be tested for TB, including parents and volunteers. Please get tested and turn in your results to the Director or Office Manager as soon as possible. Your health care provider should have testing options available.

Testing is also available at any US HealthWorks clinic, the fee is \$35.

When you get your TB test, you must have it read within 3 days. This means that you must get your TB test Monday, Tuesday, Wednesday, or Friday (IF the following Monday is not a holiday). You must provide us with written proof that your test read negative.
